EU Login Mobile App PIN Code - Security improvement - The EU Login mobile app will change the way it notifies authentication requests. Notifications will no longer pop up on your device. Instead, you will need to open the app to access pending requests. During the transition period, some iOS users may already need to select the "Pending Authentication Requests" from the app menu.

Explanation of how cookies are used on the EU Academy platform.

To make Commission websites work properly, we sometimes place small data files called cookies on your device.

What are cookies?

A cookie is a small text file that a website stores on your computer or mobile device when you visit the site.

- **First party cookies** are cookies set by the website you're visiting. Only that website can read them. In addition, a website might potentially use external services, which also set their own cookies, known as **third-party cookies.**
- Persistent cookies are cookies saved on your computer and that are not deleted automatically when you quit your browser, unlike a session cookie, which is deleted when you quit your browser.

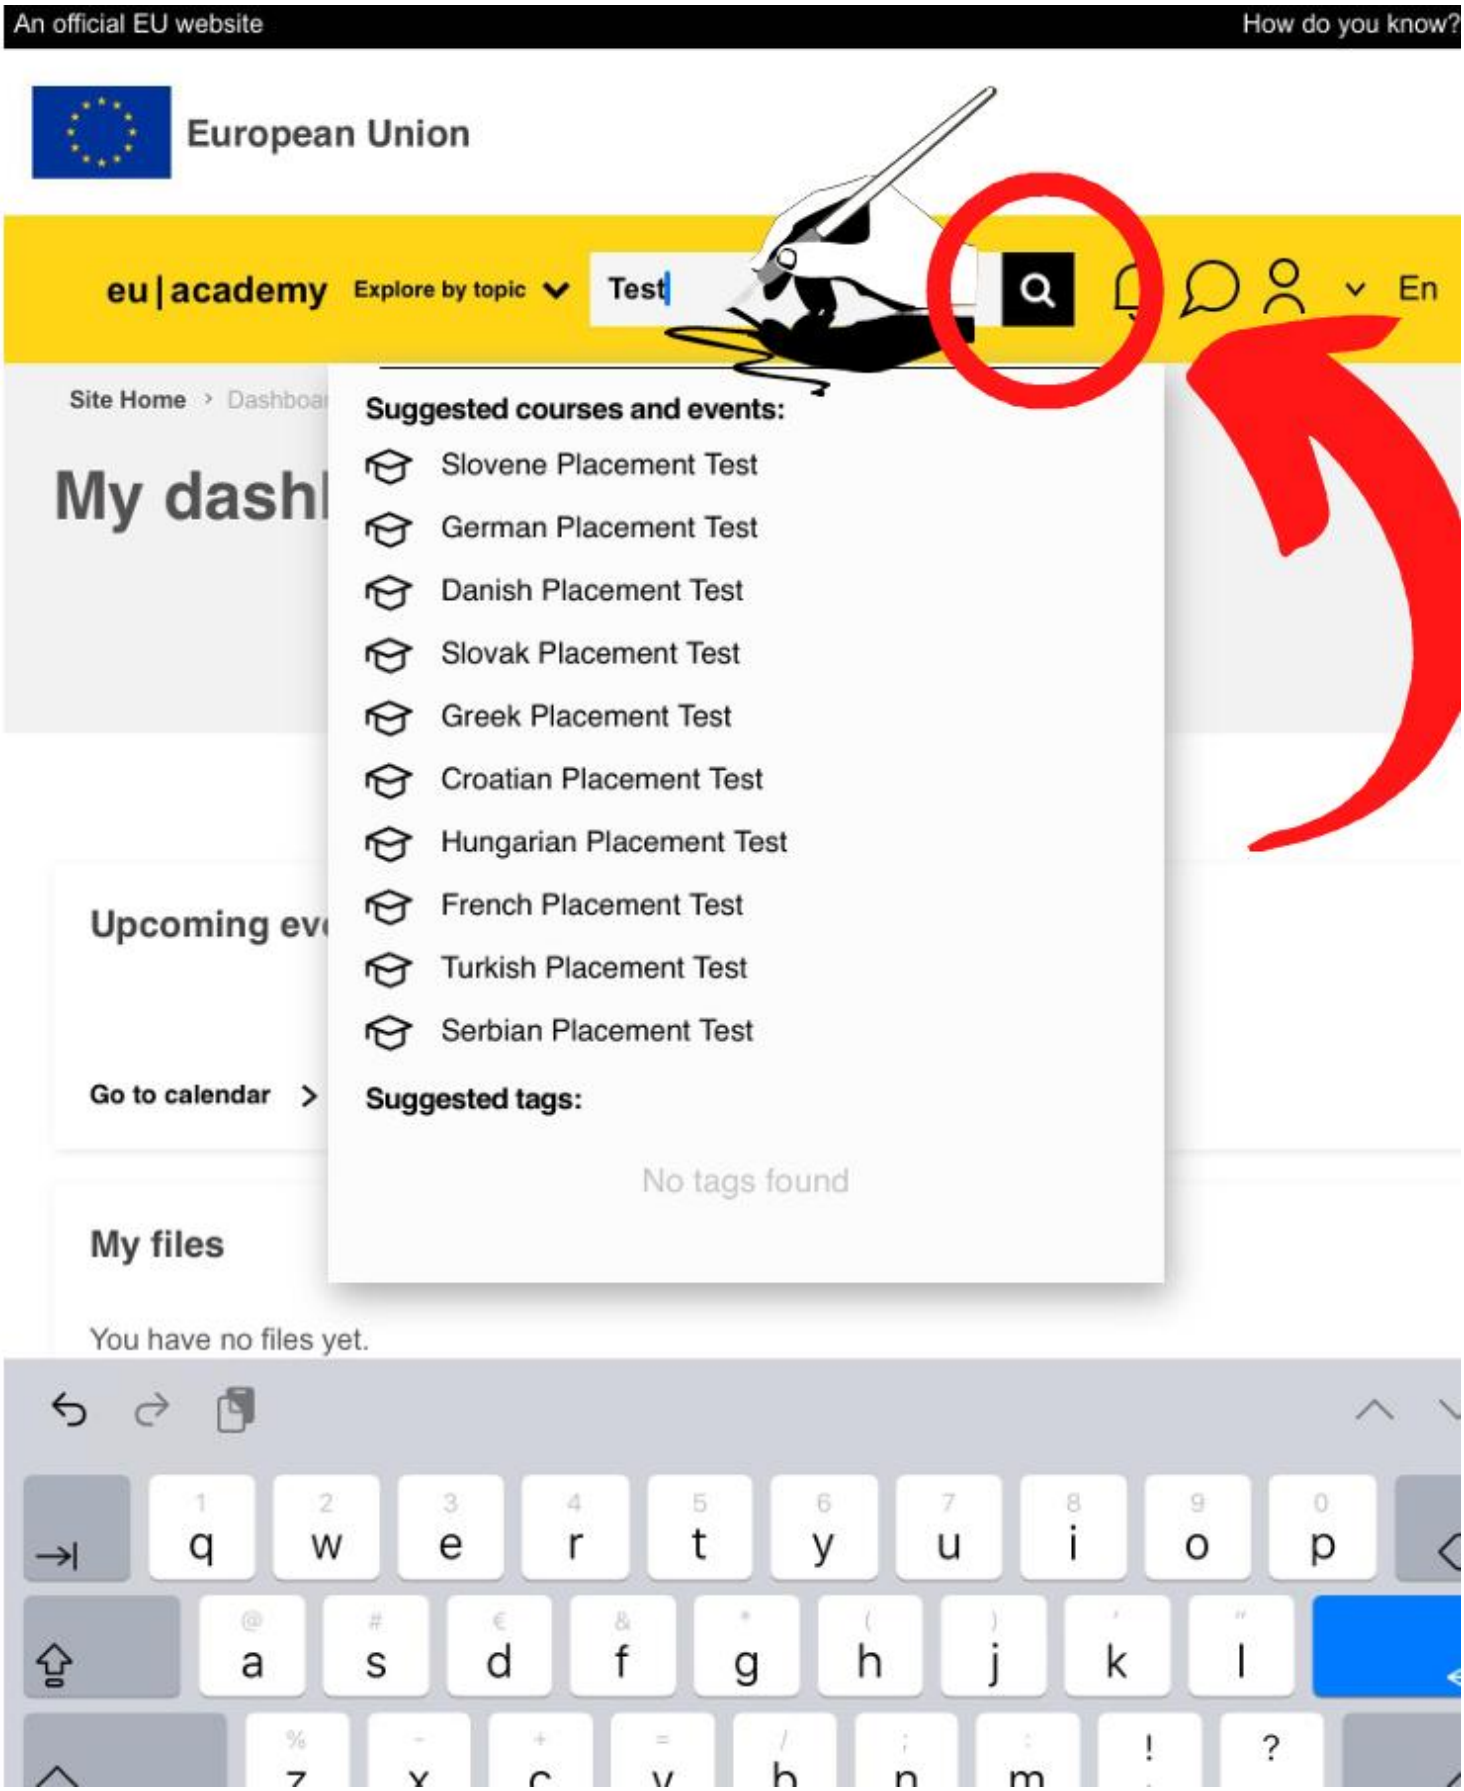

Every time you visit the Commission's websites, you will be prompted to **accept or refuse cookies.**

The purpose is to enable the site to remember your preferences (such as user name, language, etc.) for a certain period of time.

That way, you don't have to re-enter them when browsing around the site during the same visit.

Cookies can also be used to establish anonymised statistics about the browsing experience on our sites.
